

Formac disk mini USB 2.0

The Formac disk mini range was developed as a solution for storage portability, flexibility and performance. Available in large capacities of up to 250GB the Formac disk mini is an ideal companion for everyone. A durable, sleek design with fast USB 2.0 ports that also power the drive (so no need for external power supply), the disk mini series also feature an integrated shock absorption suspension system to protect the drive from the affects of day to day portable usage prolonging the life of your drive, with an optional, high-quality Tucano sleeve distinguishing the Formac disk mini as an outstanding versatile product.

Whether using your Formac disk mini for backup and transporting of important data, or for simply housing your music archives, the Formac disk mini fits everyone who attaches importance to their data, reliability, first class performance and a stand out design.
